Environmental Testing Instruments - Page 2

Special Pricing for CIPHI Members

The *LPA-1* lead paint monitoring system is designed for the inspection community and is one of the most productive lead paint analyzers manufactured today. The unit is lightweight and easy to hold, and the point and shoot capabilities offer rapid-fire readings. The software will store up to 4000 readings and report writing is a snap.

CIPHI Price: \$23500.00

The *Micro 500 pH Meter* has full laboratory specification and combines pH and temperature measurement with separate probes; an optional ORP probe is available. Its light weight, durability and compact size make it ideal for laboratory or field use.

CIPHI Price: CPT140 \$583.00

The *Dissolved Oxygen Meter* is a state-of-the-art instrument featuring the latest in DO probe design. It is waterproof and rugged with an easy to read LCD screen that displays results simultaneously in mg/l or percent air saturation and temperature. The meter is supplied with probe electrolyte solution, spare membranes, carry case and a 3m cable.

CIPHI Price: CPT148 \$2162.00

The *Micro 950 Turbidity Meter* is a portable microprocessor unit with three measuring ranges, 0.01-19.99, 20-99.9, 100-1000 NTU, for both clean and dirty water monitoring. It uses a LED IR light source at 850 nm and is in accordance with international standards on the determination of turbidity. It is simple to use and guides the operator through the calibration procedures. Turbidity standards, 0, 20, 100 & 800 NTU, are included and recognized automatically by the processor to set the proper calibration points. Date and time are automatically stored in memory. A rigid carrying case is included.

CIPHI Price: CPT390 \$1190.00

Coloured Tracing Dyes produced and manufactured in Canada by *Aquatic Life Ltd.* are second to none. Suitable for use in septic tank/field system analysis, water movement, pollution studies, retention time studies and many other applications.

Trace**RED** CIPHI Price: 13.75 Trace**Green** CIPHI Price: 11.75
