

# POOL WATER TEST INSTRUMENTS

## Pooltest 3

The Pooltest 3 is our most economical professional photometer for pool water testing. This accurate solid-state digital instrument tests for pH, free and total chlorine and cyanuric acid to a resolution of 0.01 mg/L. The unit is simple to operate and maintain, using "AA" batteries. It is extremely durable and accurate with an easy to read digital screen. Combine that with a test memory and its small pocket size and this is one great unit. Kit includes soft case, reagents and test tubes. Hard case also available.

SP 366 - POOLTEST 3 ..... \$413.73  
PT 234 - CHECK STANDARDS ..... \$57.80

## Pooltest 5

The Pooltest 5 is one step up from our Pooltest 3 unit and tests chlorine (free and total), pH, cyanuric acid as well as bromine and alkalinity. It has all the advantages of the Pooltest 3 's small size, solid-state digital durability, accuracy and 0.01 mg/L resolution with the extended parameters that allow you to test multiple disinfection systems. The instrument comes with a soft case which easily fits on a belt or in a brief case and includes reagents and test tubes. A hard case is also available.

SP 368 - POOLTEST 5 ..... \$539.64  
PT 226 - CHECK STANDARDS ..... \$57.80

## Pooltest 9

The Pooltest 9 has become the world's best-selling pool photometer, thanks to its reliability and ease of use. The New Pooltest 9 Professional builds on the phenomenal success of its predecessor, offering even more great features: Fully Waterproof with IP67 rating (it even floats), large backlit screen, unique adaptive sample holder and automatic wavelength and method selection. The Pooltest 9 Professional tests for Free Chlorine, Total Chlorine, pH, Cyanuric Acid, Alkalinity, Ozone, Calcium Hardness, Copper and Bromine. Kit includes hard case, reagents and test tubes.

**NEW – The Pooltest 9 Professional can now measure Chlorine up to 10ppm!**  
SP 790 - POOLTEST 9 PROFESSIONAL ..... \$833.46  
PT 791 – CHECK STANDARDS ..... \$57.80

## Pooltest 25

The superb Pooltest 25 Professional Photometer is a fully featured, waterproof, precision pool photometer for the most demanding professional. The instrument features a complete range of pool water tests, including the more specialised tests such as phosphate and sulphate, as well as the usual free and total chlorine, pH and alkalinity. In total there are over 25 tests on this instrument. Also featured is a fast USB computer connection which can provide power. The unit stores up to 500 results in its on-board memory and can transfer them to a PC database, spreadsheet or into a number of Pool software packages. Its IP67 rating allows the Pooltest 25 Professional to be submerged for up to half an hour in a metre of water.

**NEW – The Pooltest 25 Professional can now measure Chlorine up to 10ppm!**  
SP 725 - POOLTEST 25 PROFESSIONAL KIT ..... \$1337.14  
SP 730 - POOLTEST 25 PROFESSIONAL MINI-LAB ..... \$1517.03  
PT 804 - CHECK STANDARDS ..... \$57.80

## Micro 500 TDS Meter

The Palintest Micro 500 TDS meter measures Total Dissolved Solids and temperature (°C). This sturdy meter measures up to 3 different ranges with auto-ranging capability that switches to appropriate measuring range automatically.

PT 142 - MICRO 500 TDS METER..... \$395.75

All instruments are supplied with a test certificate confirming calibration. Rev. A 02-2009
