Objective and Rationale

CIPHI and CoPE recognize the importance of practicing EPHPs maintaining their competence. To provide evidence of this competence, Members participate in the CPC Program. The CPC Program requires Members to document PDHs acquired from working in the profession and other activities that help Members maintain the skills, knowledge, and abilities essential to the profession. Members who fail to fulfill the annual PDH requirements outlined by the CPC Program are referred to the CIPHI National Office for further action which includes loss of membership and in some cases suspension of the Member’s CPHI(C).

As part of the CPC Program’s PD Model, CoPE conducts Audits on Member PDH submissions in accordance with CIPHI Council of Professional Experience Auditing Policy and Procedures (currently under revision). CIPHI and CoPE recognize that a formal process is required for Members to appeal the results of their Audit. Appeal processes are important to ensure that each Member is treated fairly and without bias. The Appeal process must be conducted in a manner that is fair to the Appellant.

Specific Operations

The Appeal and the decision making process regarding the Appeal must adhere to this Policy.

The Appellant must submit a written Appeal as stipulated in Appendix #1.

An ARP will review Appeal submissions as stipulated in Appendix #2.

Each ARP will be drawn from a pool of Members who have been appointed by the NEC for this purpose.

There are 4 acceptable grounds for Appeal:

1) Appellant does not agree with the determination of the Auditor that the number of PDHs submitted does not comply with CPC requirements;
2) Appellant does not agree with the Auditor’s determination that activities claimed as PDHs did not substantively meet the CPC Program criteria;
3) Due to extenuating circumstances, the Appellant was unable to submit PDHs before the annual deadline but can provide evidence for PDHs that have been acquired within the Audit year; or
4) The Appellant believes there has been a process irregularity.
